

PropShield Signal Panel User Guide

Version 1.0

Welcome

The PropShield Signal Panel is the central trade execution and risk management engine for the PropShield ecosystem. It executes signals from PropShield indicators and compatible third-party signal providers while managing every trade through a unified proprietary Trade Manager.

Compatibility

Supported

- ✓ All PropShield Signal indicators
- ✓ Compatible third-party Draw.Text() Buy/Sell signal indicators
- ✓ Playback, Simulation, Live Brokerage and Supported Prop Firm accounts

Not Supported

- ✗ NinjaTrader ATM Strategies
- ✗ NinjaTrader Chart Trader trade management
- ✗ Third-party trade managers

Proprietary Trade Manager

The Signal Panel does **not** use NinjaTrader ATM Strategies. Instead, it includes the PropShield Proprietary Trade Manager, which creates and manages every stop-loss, profit target, break-even adjustment, trailing stop, and scale-out order. This unified approach enables consistent trade management, Adaptive Risk sizing, Trade Copier integration, and daily risk controls across all supported strategies.

Core Features

- Automatic Buy/Sell signal execution
- Fixed Contracts, Dollar Risk & Adaptive Risk sizing
- Initial Stop Loss & Profit Target creation
- Break Even automation
- Trailing Stop automation
- Scale Out management
- Daily Profit Goal & Daily Loss Limit
- Auto Lock after daily limits
- Trading session controls
- Trade Copier integration

Diagnostics & Support

The Signal Panel automatically creates diagnostic log files containing signal detection, order processing, trade management, connection events, and warning or error messages. The PropShield Toolkit can collect these logs into a Support Package for submission to PropShield Support.

Getting Started

1. Install the PropShield Toolkit.
2. Activate your license.
3. Download the Signal Panel.
4. Import into NinjaTrader.
5. Configure your risk settings.
6. Connect a compatible signal source.
7. Test using Playback or Simulation before trading live.

For setup videos, walkthroughs, updates, and support, visit the PropShield YouTube channel and Discord community.

Risk Disclosure

Trading futures involves substantial risk. The PropShield Signal Panel assists with trade execution and risk management but cannot eliminate trading risk. Always test thoroughly before using live capital.
